

Model Performance Comparison

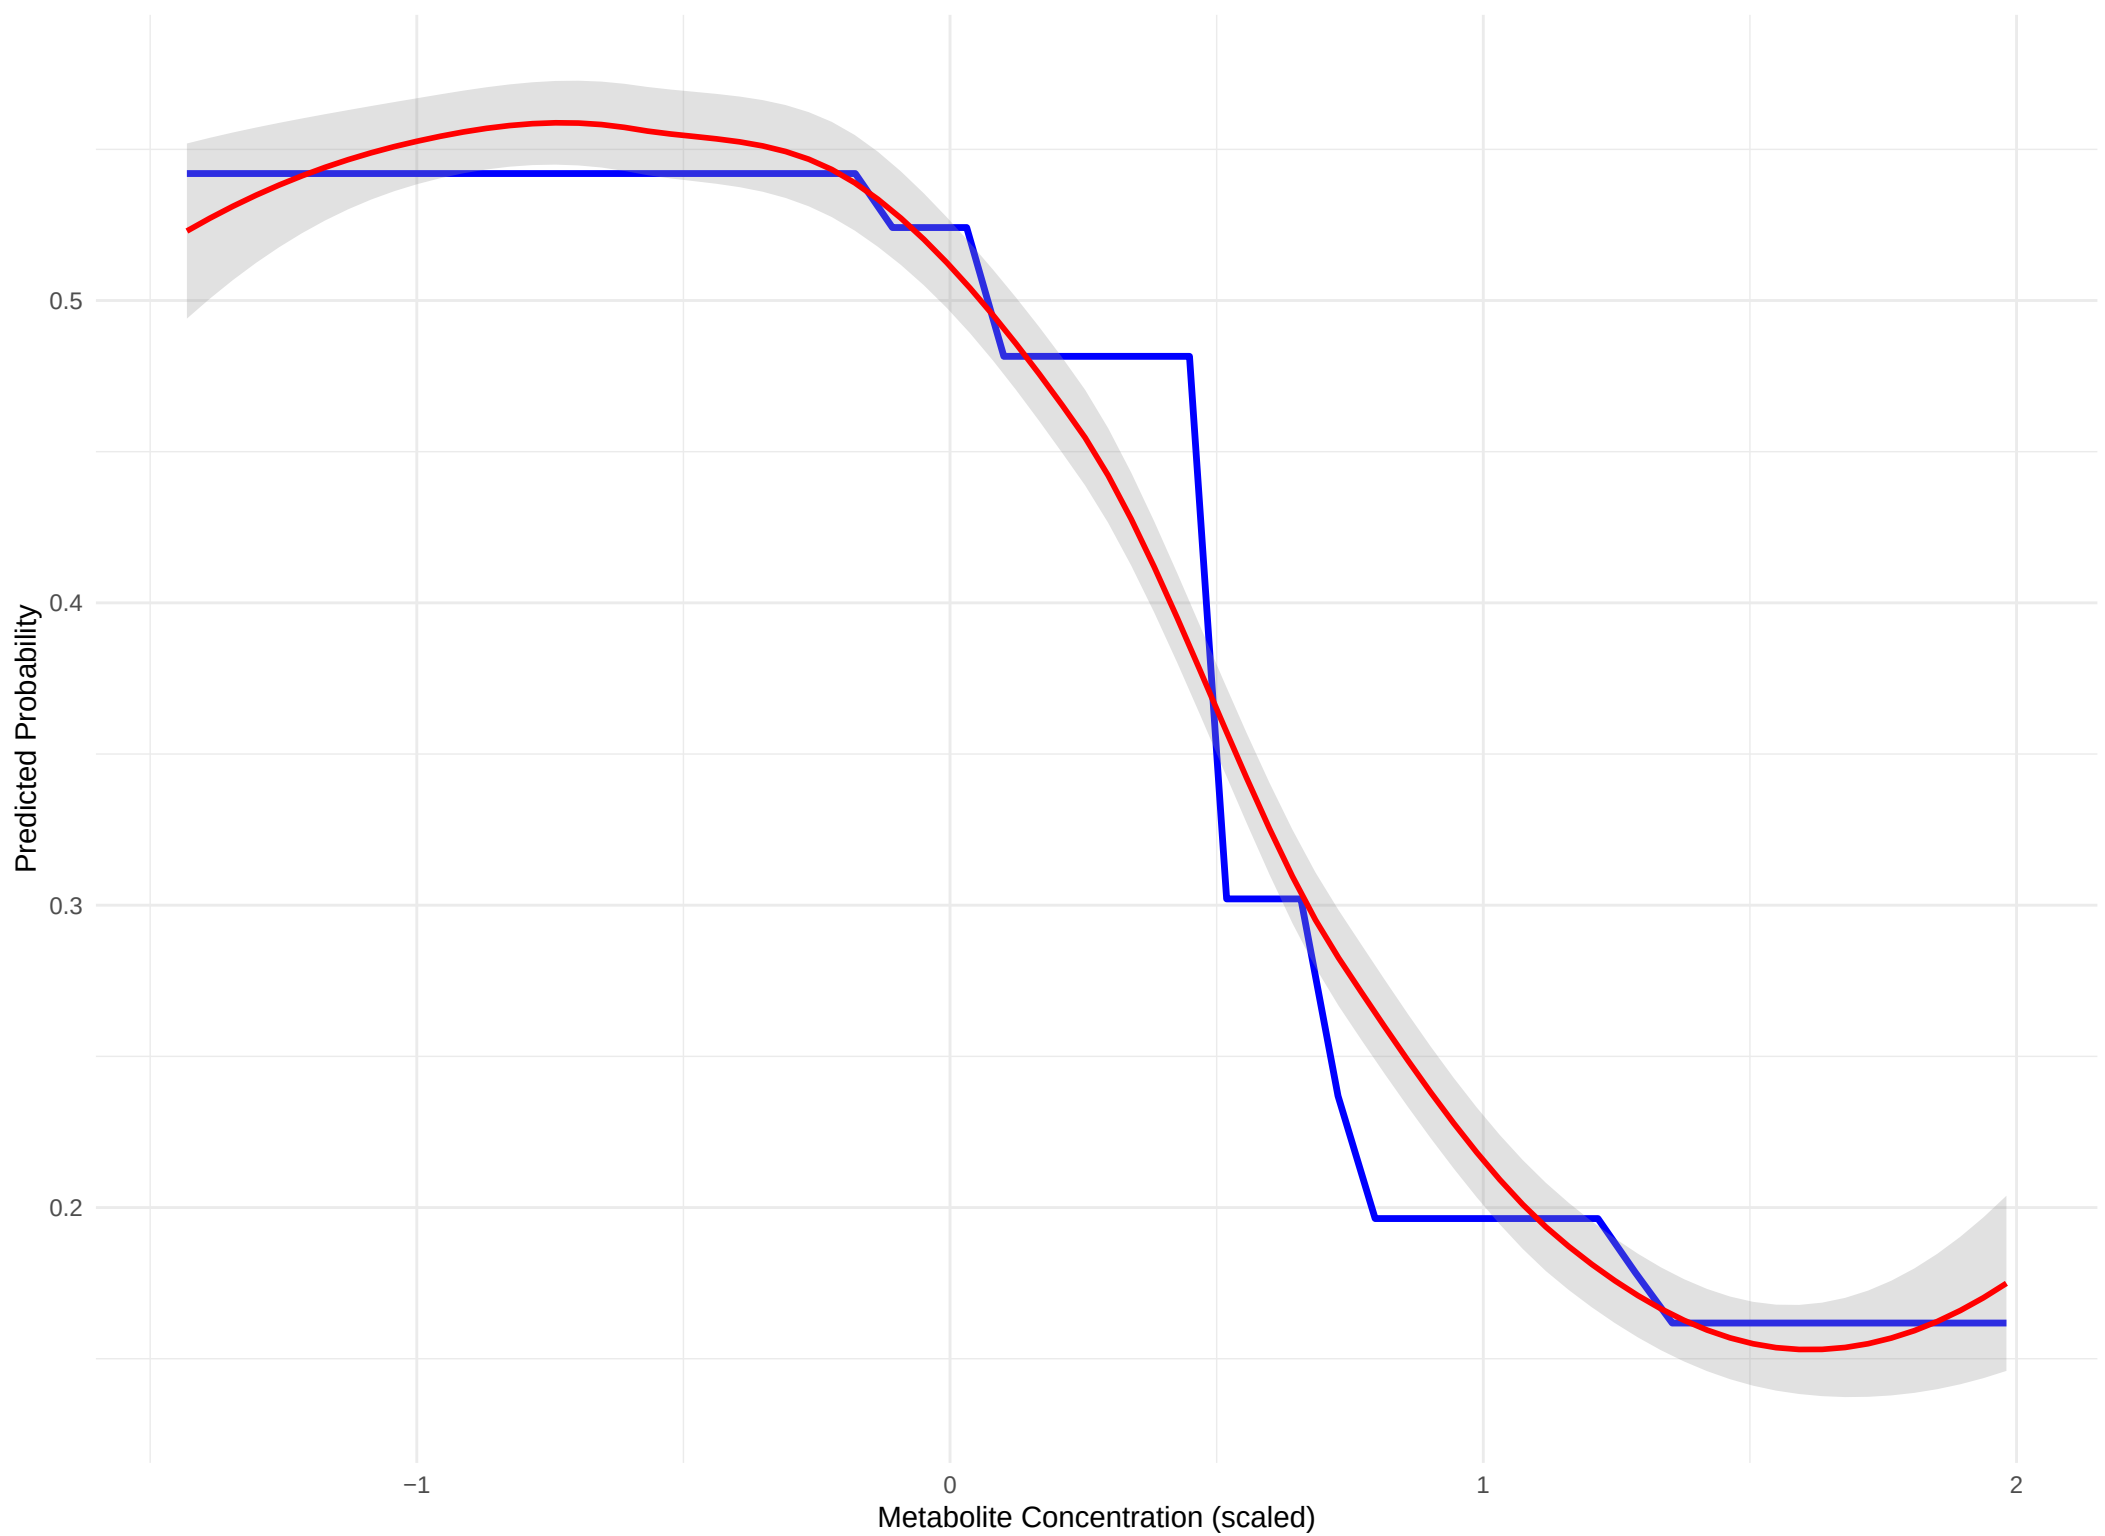

Distribution of Prediction Probabilities

Red line shows optimal threshold: 0.3

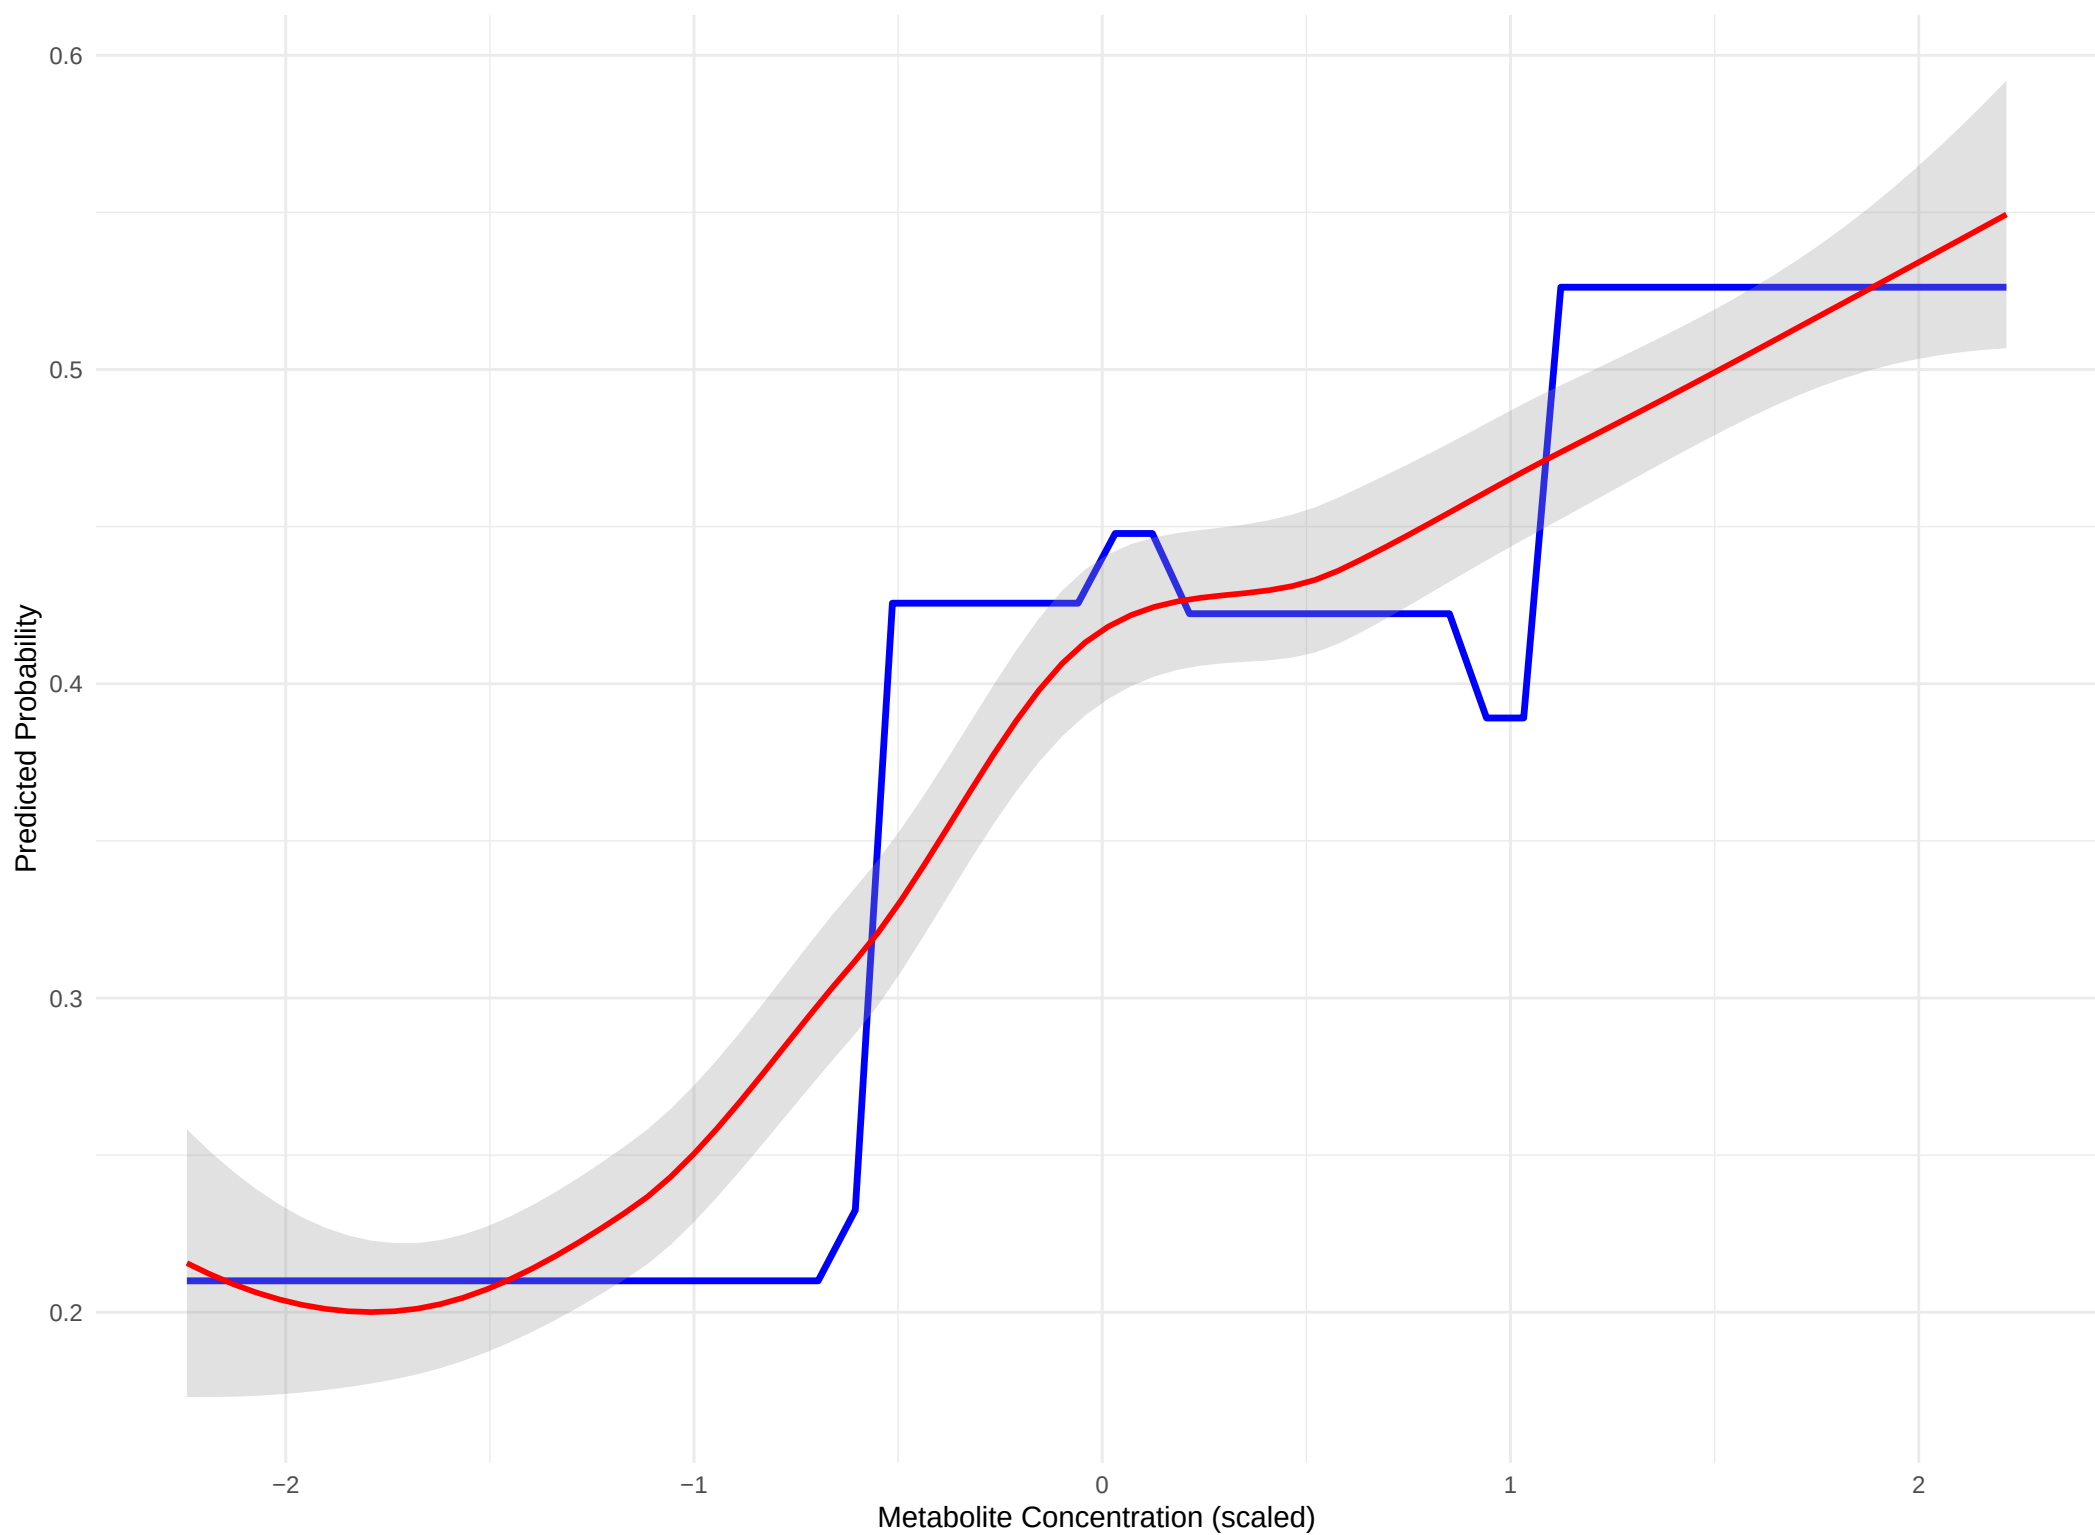

Partial Dependence: Haematommic acid

Importance: 36.6 %

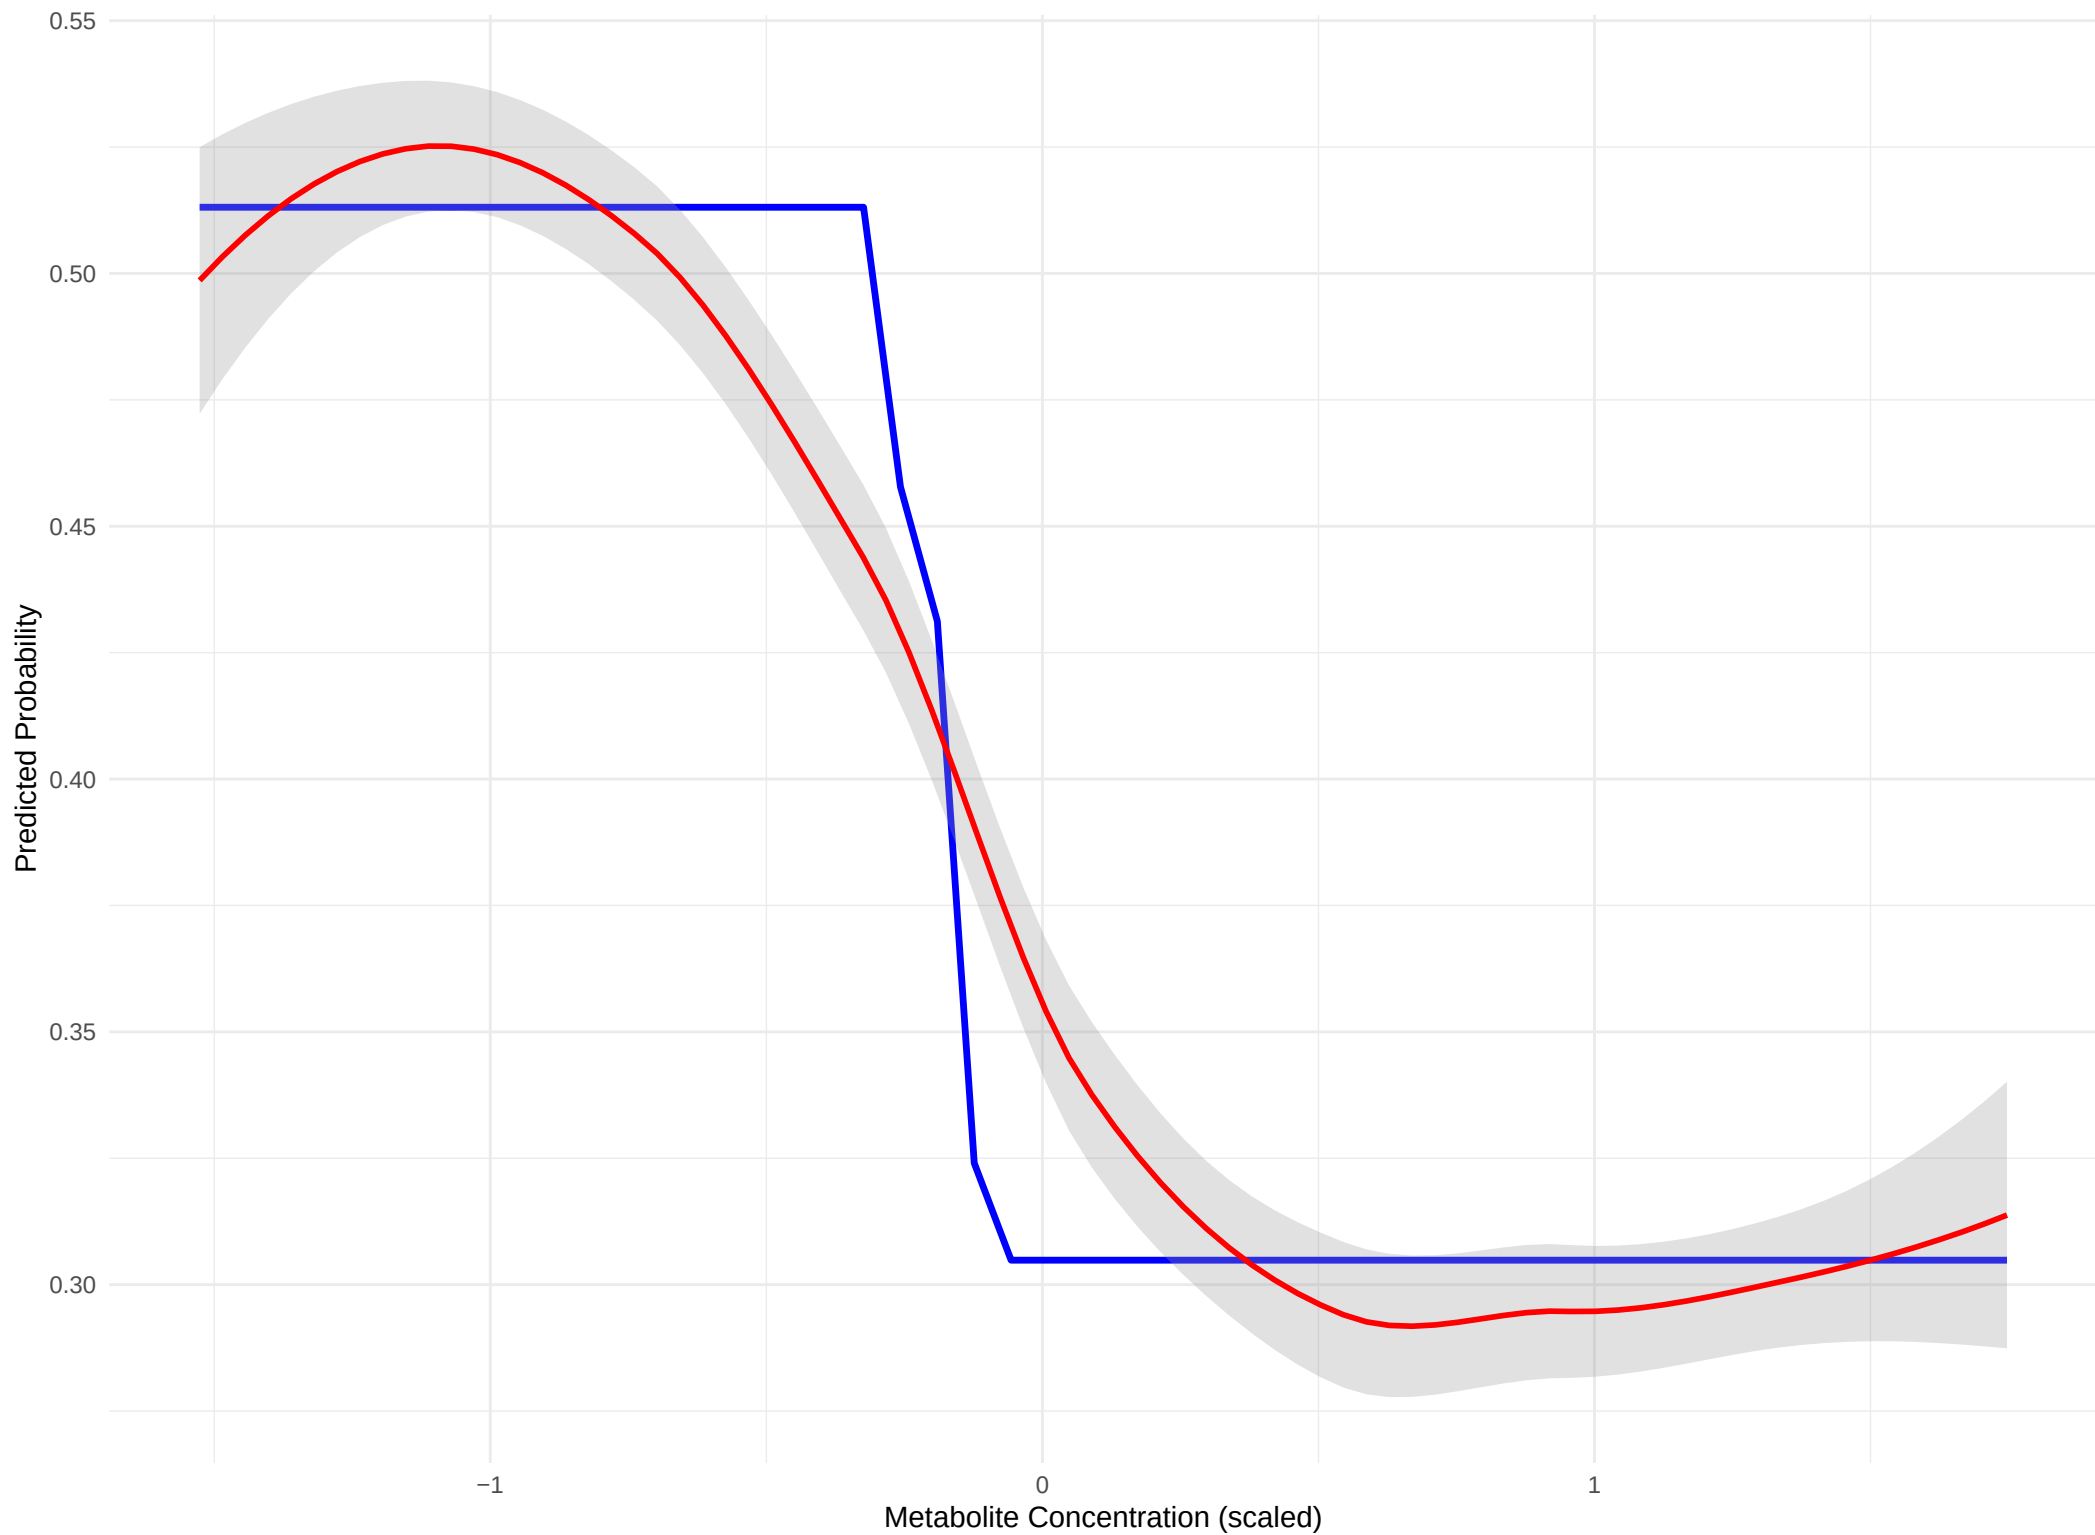

Partial Dependence: Glycerol Tributyrates

Importance: 31.2 %

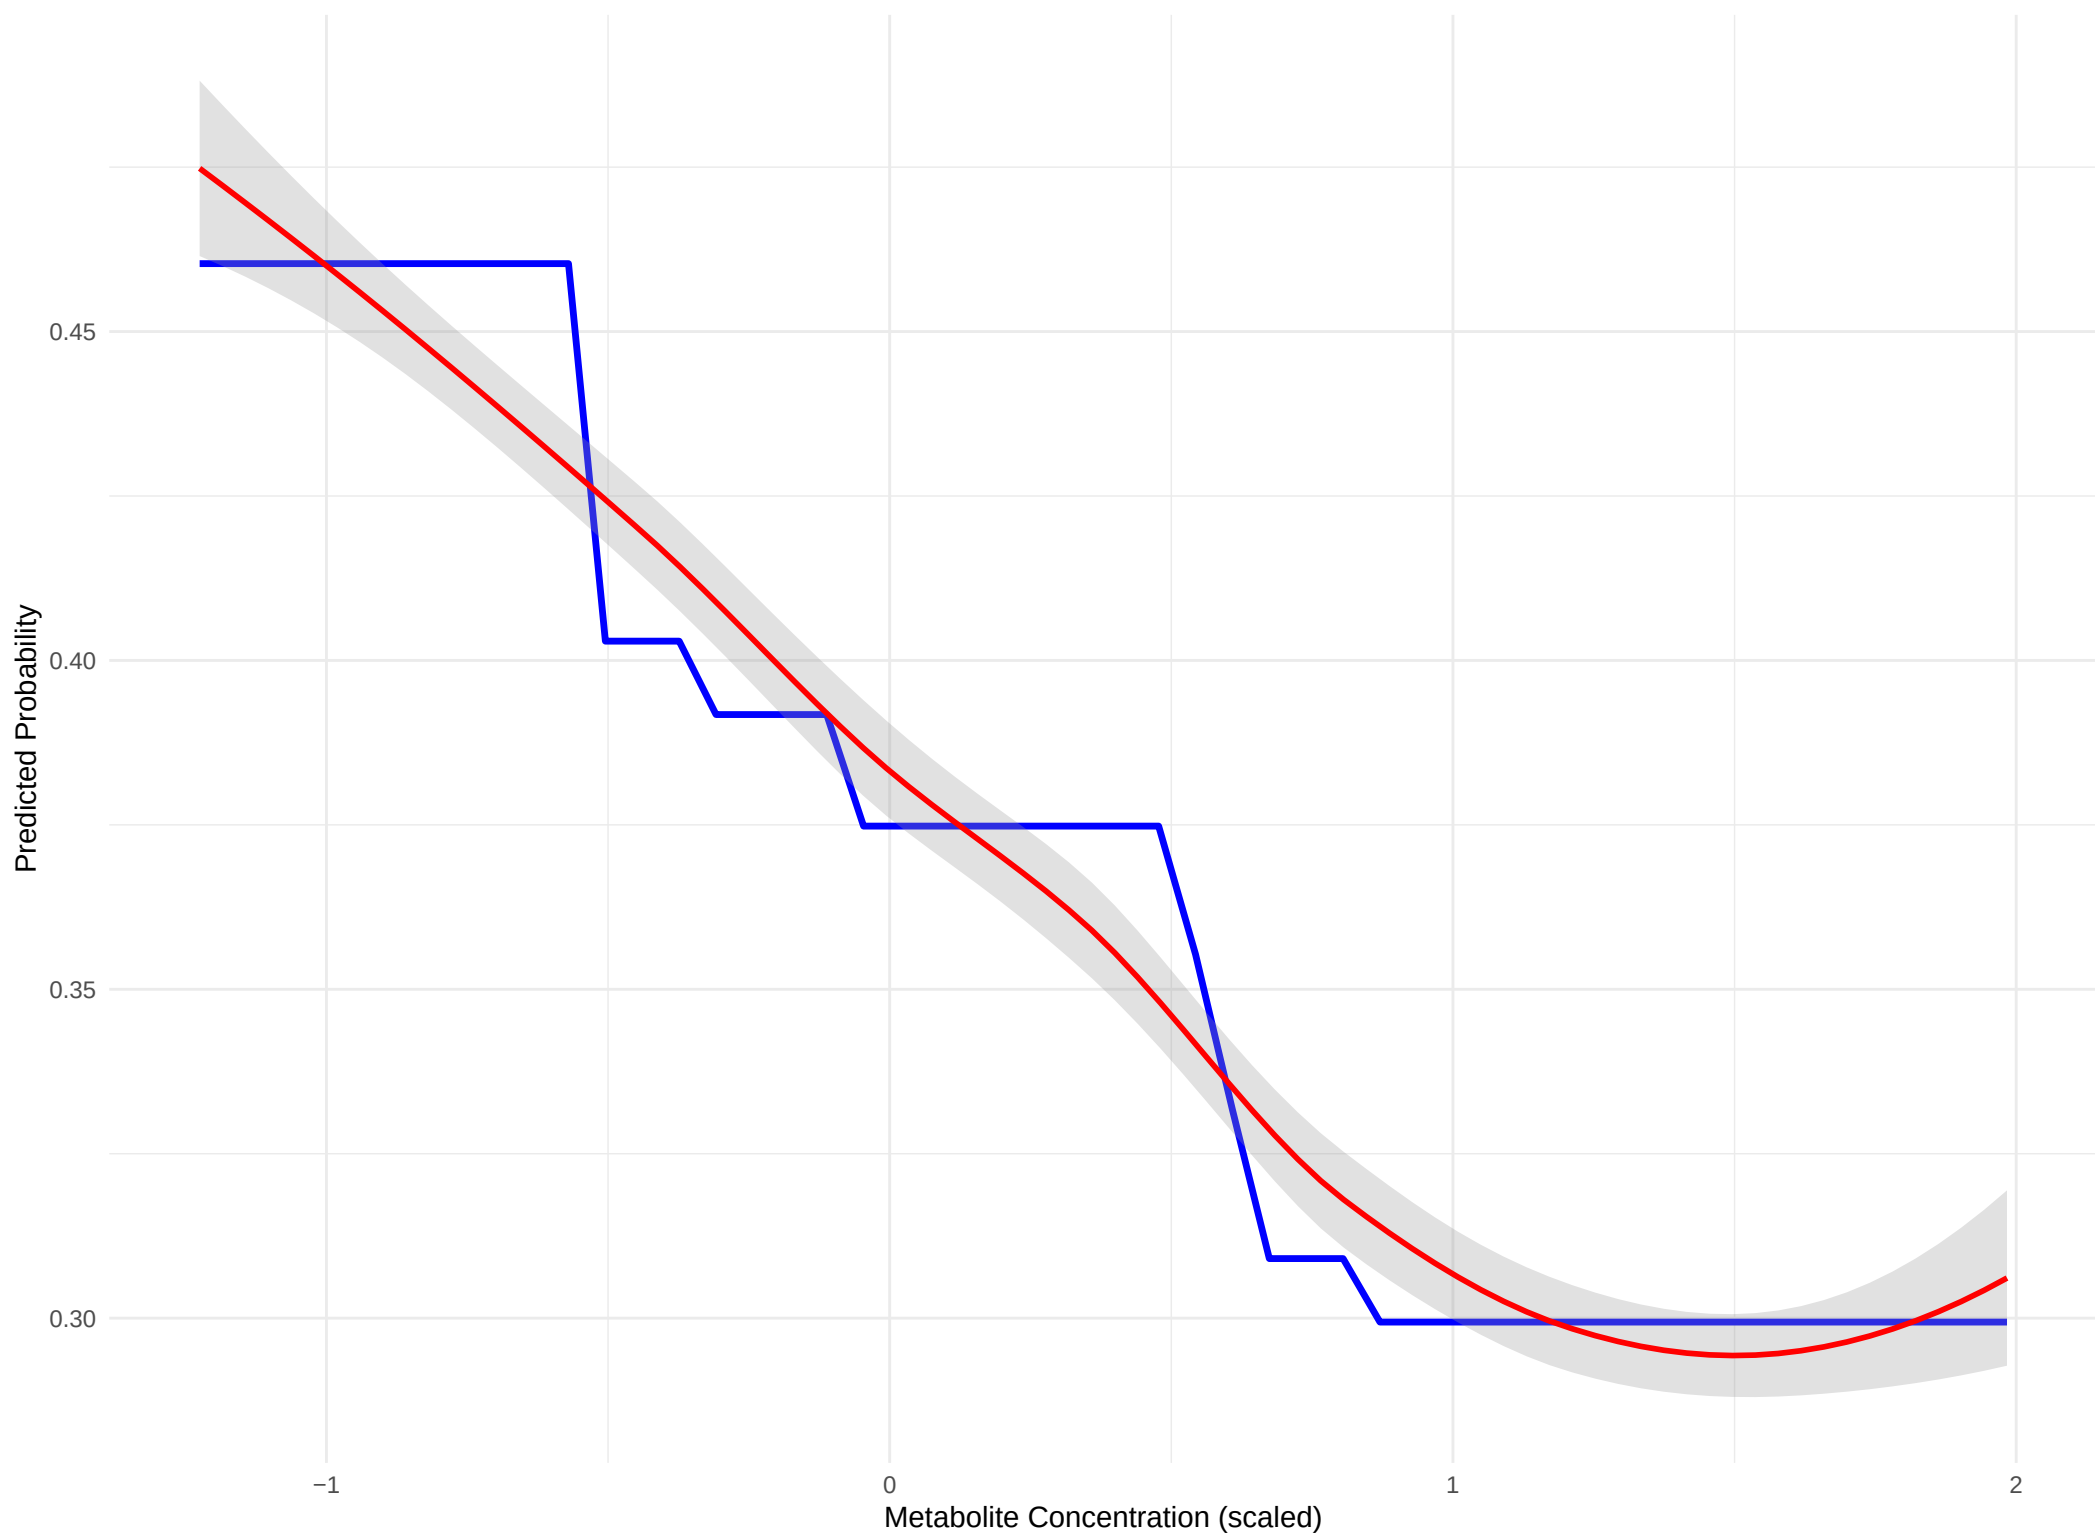

Partial Dependence: Mannitol

Importance: 13.4 %

Partial Dependence: Ribonolactone

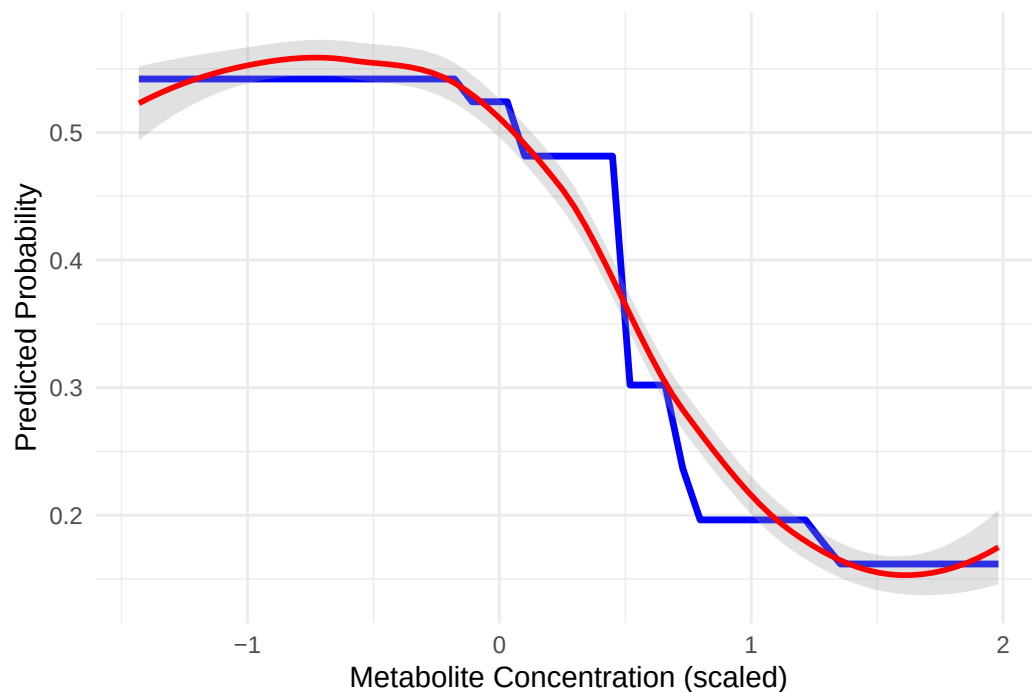

Importance: 12 %

Partial Dependence Plots – Top 4 Metabolites

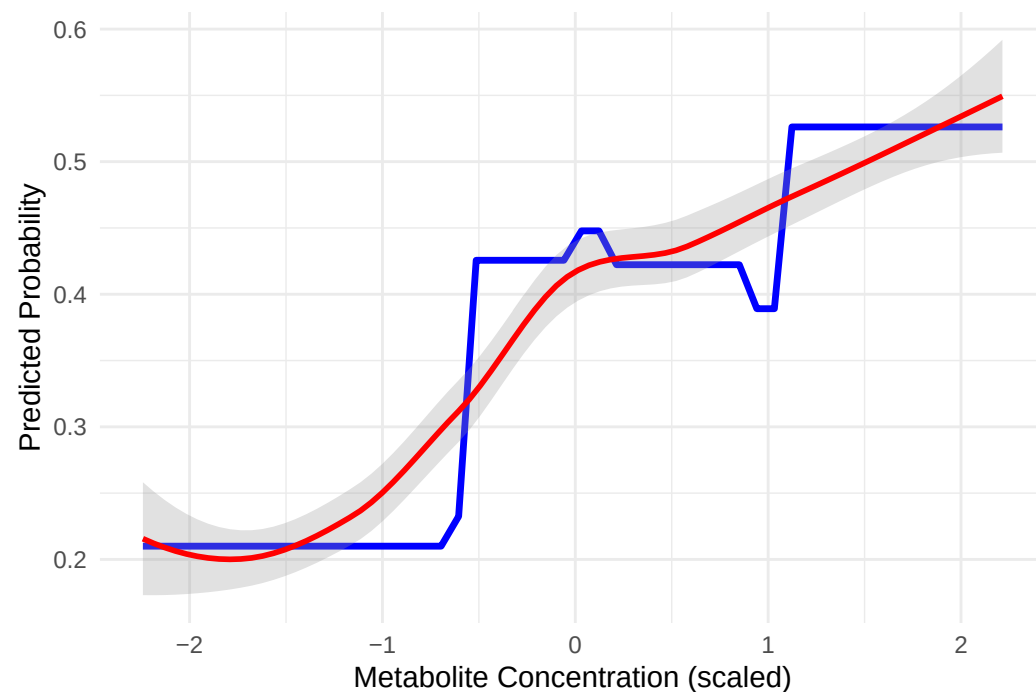

Partial Dependence: Haematommic acid

Importance: 36.6 %

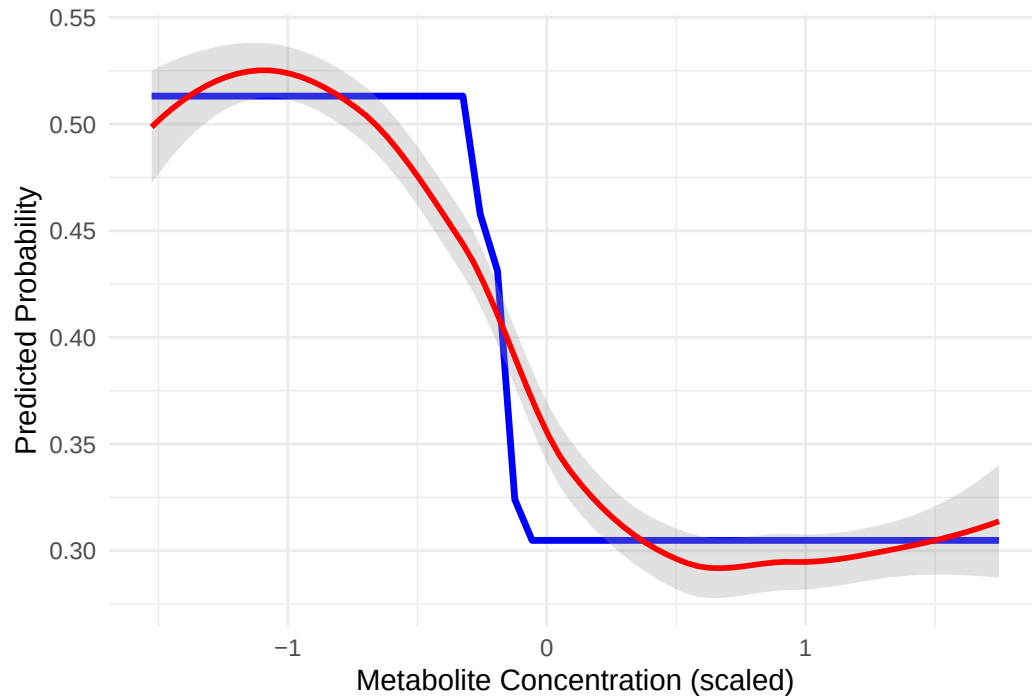

Partial Dependence: Glycerol Tributyrte

Importance: 31.2 %

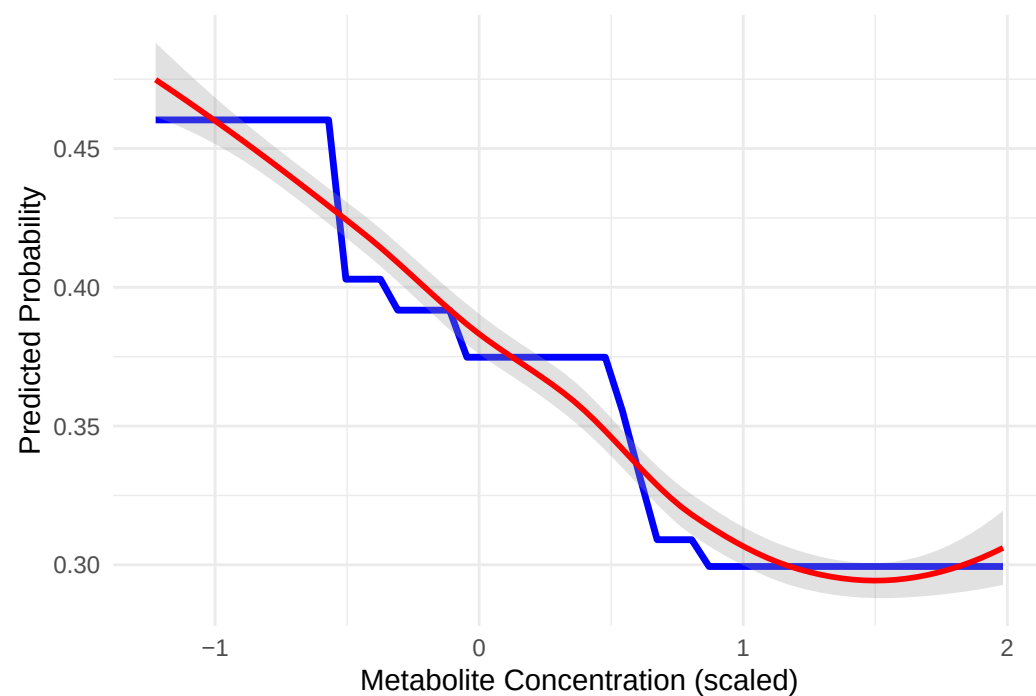

Partial Dependence: Mannitol

Importance: 13.4 %

Partial Dependence: Ribonolactone

Importance: 12 %
